

OCEANMIND - SENTINEL-V4 INTELLIGENCE NODE

MISSION: INDIAN OCEAN ANOMALY Q1

Timestamp: 2026-03-17 14:31:38
Node: Alpha-Seven-AP (Global Intelligence Link)

NEURAL ANALYTICS SUMMARY

- Aggregated Environmental Mean: 19.3 (Unit Scale)
- Peak Telemetry Deviation: N/A (Density Ratio)
- Data Throughput: 1,460 sensor packets

REGIONAL TELEMETRY DATA

Temperature
17.65
18.6
22.29
20.78
21.11
23.42
20.08
22.66
19.68
22.98

NEURAL AI RECOMMENDATION

Neural stability verification complete. System identifies a stable cluster drift. Recommending continued telemetry monitoring for mission-critical anomalies.
